\*\*\*\*\* Lots 20-52 are from the Bill Fivaz collection of wrong stock coins. They are all PCGS graded. The wrong stock thickness denominations have been determined by comparing the coins, weights to charts in back issues of Errorscope, etc. PCGS is still in the midst of deciding how to label wrong stock coins and therefore labeled all the coins simply as thick and thin planchets and stated the weight. The wrong denomination thickness to which they correspond was left off the label for the time being. Once in a lifetime opportunity for some RARE wrong stock coins!
